Water Cycle

Weekly Assignments:

This week, we will be focusing on getting everyone caught up.

I will be contacting students by phone to discuss what problems they are having in order to get them caught up this week. If I can't get them by phone, I will email them to ask them to call me so we can discuss their assignments.

I am also doing a Zoom on Monday at 10 a.m. to answer questions. If you can't be present at the meeting, please post any questions underneath the announcement and I will answer them during the meeting. I will be recording the meeting so that it can be viewed later.

I will introduce an Ocean Project on Thursday which will not be due until 4/17 for those students who are caught up and would like to work on some hands-on Science.

Weekly Assignment Information

This week we will just be working on getting caught up on the first two weeks' assignments. I will be calling each of you to see what your questions are and to help you get your assignments completed. If I can't reach you by phone, I will be emailing and asking you to call me.

On Monday at 1:00 p.m. I will be hosting a Zoom Meeting to answer any questions you have. If you cannot attend, post your questions in Classroom under the meeting announcement and I will give those answers during the meeting. I will be recording it and will get it uploaded so you can view it later.

I have made up a form for you to use to upload your notes for the Biome Poster. It is attached. It is a copy of the requirements. Just add your information for your biome under each number as you do the research and upload it. DO NOT start on the poster just take notes and include pictures you plan on using when we get to the poster. We will be working on the different pieces as we go through the Ecology Unit pieces. This is a final project for the whole unit.
